Knowledge Enrichment circle Report (2021-2022)**

I. Introduction

1. Mission Statement

The Knowledge Enrichment Circle is a Quaterly peer-to-peer platform where Students come together to exchange insights, expertise, and experiences. This initiative will serve as a hub for Students and open knowledge enthusiasts to connect, learn, and grow collectively. The Knowledge Circle seeks to elevate the open knowledge ecosystem, paving the way for sustainable growth and development as a Student/Work person .The vision is to empowerment within the Students and their Network and beyond through skill development, and a sustainable open knowledge ecosystem.

2. Objectives

- To deepen understanding through the exchange of diverse perspectives and ideas with classmates.
- To co-construct collective knowledge.
- To explore questions and ideas.
- To make connections between background knowledge, experiences and new learning.
- To practice adding evidence to support a theory.
- To find further questions and theories that can serve as new entry points for further investigation.
- To deepen understanding that all ideas are improvable.

II. Program and activities

Program

Topic-: CSR And Sustainable Development

Sustainable development and corporate social responsibility are closely related business concepts that have greatly affected corporate governance in the early 21st century. Sustainable development involves the use of environmentally responsible and efficient operational practices.

Corporate social responsibility, or CSR, involves balancing corporate citizenship and environmental responsibility to give back to the communities in which they operate, which also supports long-term business success. Socially responsible companies preserve environmental resources crucial to future generations, according to the International Institute for Sustainable Development.

II. Program and activities

Program

Topic:- Importance of Skills For Social Case Worker

Case workers generally help to improve the lives of others in the community. They often assist a community's most vulnerable members, which can require case workers to be compassionate, empathetic and pragmatic. If you enjoy helping people in your community, it may be a good career path for you to consider.

Program

Topic-: Research Paper and Copyright

What this means for researchers is that the ideas and the facts that are learned while conducting research or writing a paper are not copyrightable. However, the papers themselves (the expression of that information) can be. As such, every research paper, or draft thereof, is copyright protected the moment it is saved to a hard drive.

That copyright, in turn, limits how others can use that paper. Without permission from the copyright holder, usually the author, no one else can legally post it on a web site, share it in a journal or even use lengthy passages of it for their own research. While fair use, an exemption to the exclusive rights of the copyright holder, may protect short quotes, copyright still limits the use of longer passages and the creation of derivative works.

Topic:- Work Life Balance

In the intersection of [work](#) and [personal life](#), the **work-life balance** is the equilibrium between the two. There are many aspects of one's personal life that can intersect with work, including family, leisure, and health. A work-life balance is bidirectional; for instance, work can interfere with private life, and private life can interfere with work. This balance or interface can be adverse in nature (e.g., [work-life conflict](#)) or can be beneficial (e.g., work-life enrichment) in nature.^[1] Recent research has shown that the work-life interface has become more boundary-less, especially for technology-enabled workers.

Topic-: World Conference On Disaster Reduction-2019.

The **World Conference on Disaster Risk Reduction** is a series of United Nations conferences focusing on [disaster](#) and [climate risk management](#) in the context of [sustainable development](#). The World Conference has been convened three times, with each edition to date having been hosted by Japan: in [Yokohama](#) in 1994, in [Hyogo](#) in 2005 and in [Sendai](#) in 2015. As requested by the [UN General Assembly](#), the [United Nations Office for Disaster Risk Reduction](#) (UNDRR) served as the coordinating body for the Second and Third UN World Conference on [Disaster Reduction](#) in 2005 and 2015.

The conferences bring together government officials and other stakeholders, such as [NGOs](#), [civil society organizations](#), local government and [private sector](#) representatives from around the world to discuss how to strengthen the [sustainability](#) of development by managing disaster and climate risks. The Third UN World conference adopted the [Sendai Framework for Disaster Risk Reduction](#) 2015–2030. Previous conference outcomes include the Hyogo Framework for Action 2005 – 2015: Building the Resilience of Nations and Communities to Disasters in 2005 and the Yokohama Strategy and Plan of Action for a Safer World in 1994.

Topic-: Human Resource Policies and Practice

To a great extent, HR policies have become more business and strategic oriented with a view to making them more attractive to current and future employees. One of the most important steps that many organizations have taken is ensuring that policies and procedures of managing HR are linked with/ incorporated within strategic goals and objectives of their organizations. It is worth noting that strategic management emphasizes the significance of establishing linkage between human resource policies and organizational strategic goals. Armstrong (2009) notes that "HR policies provide guidelines on how key aspects of people management should be handled. This aims is to ensure any HR issues are dealt with consistently in accordance with the values of the organization in line with certain defined principles". HR policies therefore, if effectively implemented play a great role in the achievement of organization's goals and objectives as they elicit employee's commitment to the core values of the organization.

Knowledge Enrichment circle Report (2023-2024)

I. Introduction

1. Mission Statement

The Knowledge Enrichment Circle is a Quarterly peer-to-peer platform where Students come together to exchange insights, expertise, and experiences. This initiative will serve as a hub for Students and open knowledge enthusiasts to connect, learn, and grow collectively. The Knowledge Circle seeks to elevate the open knowledge ecosystem, paving the way for sustainable growth and development as a Student/Work person. The vision is to empowerment within the Students and their Network and beyond through skill development, and a sustainable open knowledge ecosystem.

2. Objectives

- II. To deepen understanding through the exchange of diverse perspectives and ideas with classmates.
- III. To co-construct collective knowledge.
- IV. To explore questions and ideas.
- V. To make connections between background knowledge, experiences and new learning.
- VI. To practice adding evidence to support a theory.
- VII. To find further questions and theories that can serve as new entry points for further investigation.
- VIII. To deepen understanding that all ideas are improvable.

II. Program and activities

Program

Topic-: NGOs And Social Worker In Health Care

The term "NGOs" (Non-governmental Organizations) includes different categories of entities that operate not to obtain financial gain, and also do not belong to the government sector. Non-governmental Organizations' fields of activity were described in the International Classification of Non-Profit Organizations (ICNPO). NGOs are an integral part of a democratic society. Sociological sciences emphasize their importance in enhancing social integration, implementation of the principle of subsidiarity, building civil society, social dialogue and participatory democracy. The main tasks of NGOs in the health system are providing services and health advocacy. Provision of services includes medical, social and psychological services as well as, integration activities, care and nursing, material and financial support, educational and information services and training. Health advocacy is a combination of individual and social actions designed to gain political commitment, policy support, social acceptance and systems support for a particular health goal or program. An important task carried out by NGOs is participation in the formation of health policy.

Activity

1. Group Discussion
2. Power Point Presentation

List of Engaged Students

S.No.	Name of Students	Class
I.	Hemala Bhagat	MSW II sem.
II.	Hemwanti	MSW II sem.
